

How to sign up with and use askmyGP

1 Go to www.stmarysely.nhs.uk

Click on the **askmyGP logo** (orange and blue in colour).

2 This will take you to the askmyGP secure login page.

3 To get help from your doctor, **login in and follow the on screen instructions.**

4 Don't forget askmyGP is a same day service. If you wish to be in touch with your preferred doctor, check the day they are working and make your request on one of those days.

To register for the first time on askmyGP

- 1** When you are at the welcome to askmyGP screen, select **Login to consult your GP**.

- 2** At the next screen click on **sign up as a new user**.

Complete all the fields, choose a password and tick 'please accept end-user licence agreement'.

AskmyGP is a web-based system, not an app. However, you can add it to your mobile phone home screen via a shortcut.

To do this, go to your askmyGP and for both IOS and Android, select add to home screen. This will enable the icon to work as an app. You can also set your phone to get askmyGP notifications when you receive messages.
